

# Optimal planning Effective use of man and machine

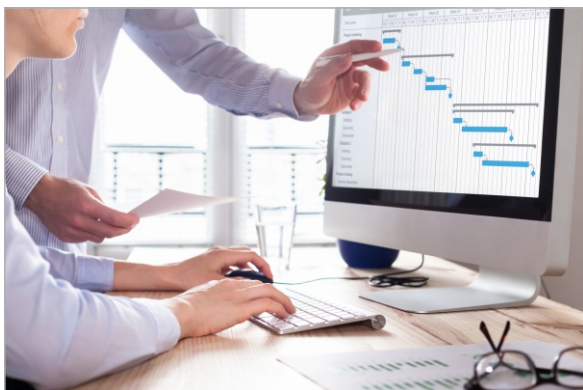

With geoCapture's deployment planning you optimize the utilization of man and machine. Sound planning ensures a smooth process. Improved operating times ensure lower costs. geoCapture offers effective tools so that your projects and construction sites run optimally.

## Functions

- Machine groups & Construction teams
- Display free capacities
- Absenteeism of man & machine
- Alerts in case of failures/collisions
- Graphical representation
- Multi user capable
- Browser Application

## Advantages

- Optimal planning
- Improved utilisation
- Lower costs
- Fewer machine transports
- Planning of construction teams
- Central data storage
- Simple operation

## The perfect planning tool

GeoCapture offers a simple web-based system for construction site planning.

In just a few steps you can assign personnel and machines to specific projects and immediately recognize free capacities. The system checks for absences such as vacation, illness of personnel or workshop appointments for vehicles or work equipment.

## Schedule columns

With geoCapture you can easily group vehicles, machines and personnel into columns.

This allows you to plan entire columns for the respective projects. If a component (man/machine) is missing due to vacation, illness or workshop, the system warns and a replacement can be scheduled.

That way you can always keep an eye on everything.

## Recognizing free capacities

You immediately recognize free machines and employees and assign them to the respective projects with one click. Important factors such as holidays, illness or workshop stays are directly visible.

Optimum planning helps you avoid overcapacities and make better use of your resources. A better utilization saves a lot of money - everyday.

## Optimum capacity utilisation

geoCapture informs you about all previous plans, absences and free capacities by tabular overview.

This gives you a quick overview of free vehicles and employees as well as possible bottlenecks and allows you to fully utilize your capacities.
