

Seamless & comfortable Time recording for mobile companies

In addition to mobile time recording, geoCapture provides you with a complete time recording software with extensive functions. Manage the working times of your employees quickly and clearly. The main focus is on construction sites and project times including intelligent driving time regulations. This way you have all important data for accounting and post-calculation available with just one click.

Functions

- Working and driving times
- Project-related
- Variable time models/seasonal working hours
- Rounding of times
- Automatic break deduction
- Time and holiday accounts
- Absence calendar
- Bad weather/expenses

Advantages

- Tracking and time recording in one system
- Great time and cost savings
- Exact working hours
- Simple post-processing
- Interface to Datev or other systems
- Transfer of wage types
- Unlimited number of employees
- Web-based, no software installation

Time recording - mobile & stationary

With geoCapture, employees record their working times in the vehicles on the move. GPS tracking automatically assigns the clockings to construction sites and other projects.

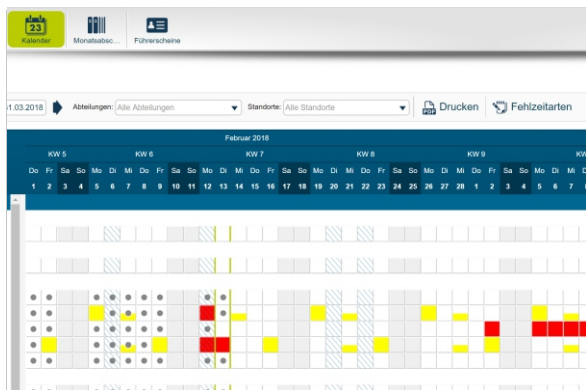

For employees in the office or in the workshop, there is also a stationary solution via terminals.

All data is transferred to geoCapture in real time and can be viewed immediately in the online portal.

Working time & driving rules

Your employees' working times are conveniently managed using time models. This includes break deduction, rounding of times/overtime and recording of travel times. Summer and winter working times can be stored with a time schedule.

Travel times are automatically calculated and taken into account on request (paid/unpaid).

Simple vacation management

Manage vacation days and other absences (e.g. illness, business trips, school, etc.) conveniently in the practical absenteeism calendar. Also bad weather times can be deposited here simply.

In addition, vacation and time accounts are automatically maintained for each employee. See all important data including target/actual comparison at a glance.

Free Interface

Interfaces to advanced programs facilitate payroll accounting or the calculation of projects. We offer the following:

- DATEV
- TopKontor blue:solution
- DATAflor business
- BPS-Software
- SAGE Lohn
- IN-FORM PROFESSIONAL
- Zeit-Lohn.net
