

Maintenance dates | Publication: 16.09.2019

Better planning Maintenance dates always firmly in view

The larger the fleet, the more deadlines for maintenance, technical inspection, tyre changes or leasing must be planned and adhered to. With geoCapture, you can monitor all fleet deadlines and thus improve the availability of your fleet.

Technology

- Live locating via GPS tracker
- Data transmission via mobile network
- For all machine types
- E-Mail reminders
- Data transmission via mobile radio
- Monitoring: inspection, maintenance, MOT tyre change, leasing period etc.

Advantages

- Management of maintenance schedules
- Automatic appointment calculation
- Keeping a maintenance log per vehicle
- Improved availability
- Recording of invoices and costs
- Timely execution of maintenance work

Higher availability of your fleet through timely maintenance

Punctual maintenance work

With the help of GPS trackers in your vehicles and machines, mileages are determined. For example, dates for upcoming oil changes can be calculated in advance. Seasonal fluctuations are also taken into account.

GeoCapture notifies you by e-mail when a maintenance date is due. Thereby you ensure that no more appointments are missed.

Manage maintenance dates

Every vehicle must be serviced regularly. No matter whether tire changes, inspections, technical inspection or the end of a lease - every fleet manager has to coordinate a large number of tasks.

GeoCapture helps you to manage and plan this great number of deadlines. This way you avoid unnecessary downtimes and optimize the availability of your fleet.

Appointment calculation

Via GPS trackers in the vehicles, performance data such as mileage and operating hours are always up-to-date. With the help of the vehicle or machine usage, the system calculates when maintenance is likely to be due.

Seasonal fluctuations are taken into account and recurring work is automatically planned. This minimizes the planning effort.

Performance data with seasonal fluctuations are taken into account.

Maintenance reports

With geoCapture you can capture every work carried out on the vehicle. The result is a gapless protocol. Incidental expenses, costs and external invoices are also recorded.

All data can be called up at any time and enable the controlling department to precisely determine the vehicle costs.
